

BIBLIOGRAPHICAL GUIDE

I AUTHORS AND WORKS

The references given in column 1 are normally the last possible for each work. This will make clear which system of chapter, paragraph, etc., division, or of pagination, is being followed, where two or more exist. Authors used as secondary sources are printed in lower case while square brackets around an author's name indicate dubious ascription. The full form of post-classical or modern collections, anthologies, etc., is given in the Supplementary List (II) below. The abbreviations for these are usually printed with lower-case initial (e.g. *anth.*, *poet.*, *trag.*). In the indication of date, Roman numerals refer to centuries.

In the description of Editions used, OCT, T, and L refer to Oxford Classical Texts (Scriptorum Classicorum Bibliotheca Oxoniensis), Bibliotheca Teubneriana, and the Loeb Classical Library respectively. The editions cited are normally those used for the original excerpting of material. Important changes in later editions have been taken into account wherever possible.
